

# Data Protection Managed Service

**LOGICALIS**  
Business and technology working as one

---

## Business Requirement

### *Safeguard your Organisations Data*

Sensitive data is constantly at risk of loss, theft, and exposure. Many times, the data simply walks right out the front door on a laptop or USB device. Companies that suffer such a data loss risk serious consequences, including regulatory penalties, public disclosure, brand damage, customer distrust, and financial losses. The rapid proliferation of mobile devices with large storage capacities and often Internet access is opening up even more channels for data loss or theft, so protecting sensitive, proprietary, and personally identifiable information must be a top priority.

---

## Logicalis Solution

LMSS manage a comprehensive suite of Endpoint security technologies that offer the customer more protection than just AV (Anti-Virus) the suite is used at an enterprise level and managed for over 50,000+ users globally by LMSS's team of experts and often the vendor partners with LMSS to offer the managed solution to larger entities that are not counted in the number above.

The Endpoint Security as a Service combines a comprehensive suite of **Managed** endpoint security and protection technologies including the following:

- ✓ Anti-Virus
- ✓ Anti-Spyware
- ✓ Desktop Corporate Firewall
- ✓ Host Intrusion Prevention and Detection
- ✓ Web Filtering (SiteAdvisor)
- ✓ Email Server Antivirus
- ✓ Device Control
- ✓ ePO ePolicy Orchestrator
- ✓ Full Disk Encryption (Win+Mac)
- ✓ File Encryption for Removable Media (Win+Mac)
- ✓ Multi-Platform Antivirus for (Win+Mac+Linux+Unix)
- ✓ Antivirus for Storage Servers
- ✓ Antivirus for SharePoint
- ✓ Mobile Device Management
- ✓ Management of the Full Endpoint Security Suite with daily monitoring
- ✓ RSD Rouge System Detection

---

## Business Benefits

- ✓ Stop data loss initiated by sophisticated malware that hijacks sensitive and personal information.
- ✓ Secure data when its stored on desktops, laptops, tablets and other mobile devices.
- ✓ Enterprise-grade drive encryption ensures only authorised access.
- ✓ Encrypt storage on desktops, virtual desktop infrastructure workstations, laptops, tablets and removable media such as CD/DVD and USB flash drives.
- ✓ Prove compliance with advanced reporting and auditing capabilities; monitor events and generate detailed reports that show auditors and other stakeholders your compliance with internal and regulatory privacy requirements.

---

## Logicalis' Managed Security Services

Logicalis has a unique capability to build, host, support and manage any size of communications and computing infrastructure. Accredited by the leading security vendors and managed service providers, Logicalis operates UK Managed Service Centres and in-house UK Tier 3 managed hosting facilities.

---

## Service Value

- ✓ **Managed Anti-Virus**— Protects your workstations and Servers, keeping your endpoints free from a wide range of threats - viruses, worms, rootkits and Trojans.
- ✓ **Managed Antivirus for Storage Servers**—Limits the exposure of Network Attached Storage Devices by preventing malware from penetrating NAS systems.
- ✓ **Managed Antivirus for SharePoint**—Ensures that corporate SharePoint deployment does not spread malware deliberately or inadvertently or store inappropriate content, or lead to data loss.
- ✓ **Managed Desktop Corporate Firewall**—Provides security for individual workstations and laptops. It protects these computers from external threats (like hackers) and from internal threats (like some viruses and more specially worms and Trojans).
- ✓ **Managed Host Intrusion Prevention and Detection**—Scans traffic destined for your computer and identifies any potential attacks on your system.
- ✓ **Managed Web Filtering (SiteAdvisor)** - Managed and installed in the corporate environment and will alert you to potentially risky sites and help you find safer alternatives.
- ✓ **Managed Email Server Antivirus**—Detects and filters viruses, worms, Trojans and other potentially unwanted programs.
- ✓ **Managed Device Control**—Protect critical data from leaving your company through removable media such as USB drives, Smart Phones, Bluetooth devices, and recordable CDs and DVDs.
- ✓ **Managed ePO ePolicy orchestrator**—Unifies security management of the endpoint products, making risk and compliance simpler and more successful for your organisation.
- ✓ **Managed Full Disk Encryption (Win+Mac)** - Military grade encryption ensures only authorised users have access to data.
- ✓ **Managed file encryption for removable media (Win+Mac)** - Encrypt removable media and prevent any removable devices which are not encrypted from being used on your endpoints.
- ✓ **Managed Mobile Device Management**—Monitor, Manage and secure employee's mobile devices.
