

Managed FireMon

F I R E M O N

 **LOGICALIS**
Business and technology working as one

Business Requirement

Reduce the burden of managing your firewalls in your network.

Managing complex networks and firewall installations with multiple devices from different vendors in use, is fraught with difficulties and the risk to inadvertently leave security gaps.

This solution allows rules and configurations to be compared and see their impact across the network, reducing complexity and improving security posture therefore reducing the time and cost to implement business critical network changes.

This allows effective security management by understanding configurations in real-time, intelligent planning of ongoing changes, and a holistic view of your security posture.

Logicalis Solution

Logicalis offers a solution with advanced functionality to effectively manage the security of large, complex network environments.

Logicalis' FireMon solution provides enterprise security management software that gives companies deeper visibility and tighter control over their network security infrastructure.

FireMon's integrated solutions suite enables customers to analyse and identify network risk, proactively eliminate those vulnerabilities and strengthen security throughout the organisation, and reduce the cost of security operations and compliance.

Business Benefits

- ✓ Clean-up your firewall rules to reduce risk, complexity and unnecessary access.
- ✓ Engineer new rules faster and more accurately.
- ✓ Track all changes to the firewall.
- ✓ Enforce compliance and continuous policy assessment.
- ✓ Measure your exposed risk.
- ✓ Stop attacks before they propagate.
- ✓ Increase efficiency with prioritised vulnerabilities.
- ✓ Prepare zero-day exposure.
- ✓ Real time security policy change management
- ✓ Continuous monitoring of network devices.
- ✓ Audit log of all changes.
- ✓ Extensible analysis and reporting.
- ✓ Proactive Security Intelligence
- ✓ Continuously analyse, visualise and improve your existing network security infrastructure.
- ✓ Visibility and continuous monitoring

Logicalis' Managed Security Services

Logicalis has a unique capability to build, host, support and manage any size of communications and computing infrastructure. Accredited by the leading security vendors and managed service providers, Logicalis operates UK Managed Service Centres and in-house UK Tier 3 managed hosting facilities.

Service Value

The insight and control delivered by the solution suite enables the IT and security teams to take an educated and coordinated approach to network planning and protection, helping companies automatically find and fix potential problem areas before they impact the network. It consists of several components:

- ✓ **Security Manager**—makes daily operations more efficient, providing powerful configuration analysis and proactively reducing risk.
- ✓ **Policy Planner**—a web-based system for collecting firewall change tickets, recommending rule changes, and allowing for audit validation. Policy Planner enables IT security organisations to gain significant efficiency by automating the change process and giving firewall administrators the tools to make accurate and compliant rule-base changes.
- ✓ **Risk Analyser**—Introduces a new way to measure risk. Instead of calculating threats and vulnerabilities, risk is measured in hypothetical attacks, or attack scenarios.

Service Overview

- ✓ Access Path Analysis
- ✓ Attack Path Identification
- ✓ Audit Log
- ✓ Change Notifications
- ✓ Change Reporting
- ✓ Customised Analysis
- ✓ Deep Network Risk Visibility
- ✓ Expired Rules Tracking
- ✓ Firewall Complexity Scoring
- ✓ Firewall Policy Optimisation
- ✓ HA Consistency
- ✓ Hidden Rule Identification
- ✓ Insight
- ✓ Multi-tenant Permissions
- ✓ Pre-change Compliance
- ✓ PCI Analysis
- ✓ Risk Measurement
- ✓ Risk Recommendations
- ✓ Risk Scoring
- ✓ Rule and Object Usage
- ✓ Rule Documentation
- ✓ Security Topology
- ✓ Traffic Flow Analysis

About the Team

Our dedicated security professionals are certified and trained in security disciplines and methodologies. The Value that the Logicalis Managed security Services security adds is not limited to our extensive security team in the SOC Security Operations Centre that help with correlation of endpoint security events.

Our seasoned team are skilled in deploying, maintaining, alerting and reporting on security events that could potentially result in security incidents.

Protect your
Organisation
from an
Attack Across
the Network
