

# Security Operations Centre (SOC)

## Business Requirement

### *Monitor the security of your systems*

IT systems are critical to today's modern organisations, however with security breaches regularly appearing on front page news, the need for good cyber security is critical to business operations.

In order to maintain exceptional protection against the ever growing threats an organisation can face, organisations need to have dedicated qualified security professionals protecting them, in this highly complex and continually evolving field.

The Logicalis Security Team provide a Security Operations Centre (SOC) staffed by 19 dedicated fully trained security professionals, ready to support customers day to day, and when a security incident is impacting their business operations.

## Logicalis Solution

*The MSS SOC combines MSS security research with service-level data from monitored devices across your networks to help you manage vulnerabilities discovered in*

The product features Security Information and Event Monitoring (SIEM) and event handling. Security analysis synchronises the management of deployed security devices, networks and applications.

- ✓ ISO27001 certified SOC facility.
- ✓ Real-time integration of functionality and research that provides interactive content, daily assessment and proactive vulnerability notifications, alerts and advisories, detailed trend analysis and attack metric reporting.
- ✓ Easy-to-read, business-focused reports with customisable views of activity at the enterprise, work group and device levels.
- ✓ Support on demand with real-time, interactive communications, security incidents and ticket data.

## Business Benefits

- ✓ A team of security experts that typically would not be found in any one organisation, is on hand for consultancy and advice.
- ✓ Advanced, monthly, weekly and daily reporting as required for compliance and visibility.
- ✓ Proactive monitoring and incident response if requested.
- ✓ Correlate events in the SOC (Security Operations Centre) and advise customers of potential APTs and other related threats.
- ✓ Security posture enhancement.
- ✓ Meaningful alerting.
- ✓ In depth product knowledge.
- ✓ Remediation and troubleshooting is handled by our team
- ✓ as LMSS have access to the vendors at platinum or elite levels so that errors or issues are solved in a timely manner.
- ✓ Reduced organisational risks.
